ESCA Tech is pleased to announce the D-Lead<sup>®</sup> Paint Test Kit, EPA Recognized and ETV Tested for use on Plaster, Drywall, Wood and ferrous Metal Surfaces.

The D-Lead<sup>®</sup> Paint Test Kit provides EPA Certified renovators a fast and easy EPA Recognized test for lead based paint on Plaster, Drywall, Wood and ferrous Metal Surfaces.

<http://epa.gov/lead/pubs/testkit.htm>

We will be providing EPA Certified RRP trainers a sample D-Lead<sup>®</sup> Paint Test Kit for review. Sample kits are expected to begin shipping in late September with kits commercially available through ESCA Tech, Inc., distributors in early October

If you would like to receive a sample D-Lead<sup>®</sup> Paint Test Kit please provide your EPA accreditation number and the address where you would like the sample shipped.

We invite you to review our website for the most up to date information on the D-Lead<sup>®</sup> Paint Test Kit and our entire line of lead contamination control products
